So the absolute value of 6 is 6, and the absolute value of  $-6$  is also 6. More Examples: The absolute value of  $-9$  is 9; The absolute value of 3 is 3; The absolute value of 0 is 0; The absolute value of  $-156$  is 156; No Negatives! So in practice "absolute value" means to remove any negative sign in front of a number, and to think of all numbers as positive (or zero). Absolute Value Symbol

Absolute Value Equations. Recall that the absolute value of a real number  $a$ , denoted  $|a|$ , is defined as the distance between zero (the origin) and the graph of that real number on the number line. For example,  $| -3 | = 3$  and  $| 3 | = 3$ . Figure 2.6.1. In addition, the absolute value of a real number can be defined algebraically as a piecewise function.
