Read Book Asteroid Retrieval Feasibility Study

In September 2012, the NASA Institute for Advanced Concepts (NIAC) announced the Robotic Asteroid Prospector project, which will examine and evaluate the feasibility of asteroid mining in terms of means, methods, and systems.

Asteroid mining - Wikipedia

Read Book Asteroid Retrieval Feasibility Study

The Asteroid Retrieval and Utilization mission, excluding any manned missions to an asteroid which it may enable, was the subject of a feasibility study in 2012 by the Keck Institute for Space Studies. The mission cost was estimated by the Glenn Research Center at about \$2.6 billion, of which \$105 million was funded in 2014 to mature the concept.
