can simply be defined as the process of creating new features from the existing features in a dataset. Let's consider a sample data that has details about a few items, such as their weight and price. Now, to create a new feature we can use Item_Weight and Item_Price. So, let's create a feature called Price_per_Weight.

This R.E.A.L. mod, as the one I made for No One Lives Forever 2, was a labor of love. Modding GTA V was actually even harder than NOLF2 (to the point of becoming soul-crushing at times), because it took a lot more reverse engineering and trial-and-error, and because the game is so much vaster. I poured all of my free time for almost
