given often—twice a week at minimum—to be effective. Cost and time commitments would be required for all interventions. Massage alone twice a week would require 4 hours of total time commitment (massage and travel time), and the cost would be \$100 per week. The financial burden for this client is not a concern for a short-term intervention

## **Case Studies - Evolve**

† Because they are simply reports of standard clinical care, case reports and case series do not require research ethics committee review. Case studies and single-subject research are considered research on humans, requiring ethical oversight, as well as informed consent. For more on ethics considerations, see the IJTMB June 2016 editorial.
