Transfer, Fourth Edition

heat transfer occurs directly between the skin in contact with air or water, as well as between the apparel that is in contact with the surrounding environment. Thus, air moving across skin provides convective cooling.

Mass Transfer - 2nd Edition - S...

Convective heat transfer, or convection, is the transfer of heat from one place to another by the movement of fluids, a process that is essentially the transfer of heat via mass transfer. Bulk motion of fluid enhances heat transfer in many physical situations, such as (for example) between a solid
