High-Speed Internet, Phone & TV | Frontier.com

Wired networks use Ethernet cable to connect the computers to the network. This makes wired networks less expensive, faster, and more secure than wireless networks. All the computers on a wired network can access the Internet through a single router or gateway, but the requirement for Ethernet connections limit the flexibility of a wired network.

Network Setup and High Speed Internet FAQ | Verizon

Your home Wi-Fi network will also impact your internet speed. The more devices on your network using the internet at the same time, the more bandwidth you will need. Many internet service providers offer Wi-Fi networking as an option. If you want to get the most out of your internet service, we highly recommend this option.
