Hydro Excavation Truck Operation Manual

A vacuum truck or vacuum tanker is a tank truck that has a pump and a tank. The pump is designed to pneumatically suck liquids, sludges, slurries, or the like from a location (often underground) into the tank of the truck.The objective is to enable transport of the liquid material via road to another location.

Daylighting & Hydro Excavation | Clean Harbors

Suction excavation is a new and innovative solution to traditional excavation methods. The technology allows high powered fans to safely excavate up to 43metres depending on the configuration. A small surface area hole of 250mm (depending on ground conditions) is created and then the suction excavator hose removes below surface materials.

Suction excavator - Wikipedia

The LP Series Hydro Excavator has all the power needed to excavate a variety of wet and dry material safely. The low profile hydro excavator units come equipped with a hydraulic rear door, which opens fully so the operator can completely empty the contents. The LP Series offers the patented filtration system that is unmatched by our competitors.
