September 22, 2003, Medford, New Jersey—Information Today, Inc. (ITI) announces the publication of Information Representation and Retrieval in the Digital Age, by Heting Chu, Ph.D. This is the latest release in the ASIST Monograph Series, which is published by ITI on behalf of the American Society of Information Science & Technology (ASIST).

Information Representation and Retrieval in the Digital Age

Information retrieval (IR) is the activity of obtaining information system resources that are relevant to an information need from a collection of those resources. Searches can be based on full-text or other content-based indexing. Information retrieval is the science of searching for information in a document, searching for documents themselves, and also searching for the metadata that ...

Information retrieval - Wikipedia

Information processing , the acquisition, recording, organization, retrieval, display, and dissemination of information. In recent years, the term has often been applied to computer-based operations specifically. In popular usage, the term information refers to facts and opinions provided and received during the course of daily life: one obtains information directly from other living beings ...
