Introducing Demand Driven Replenishment Ddmrp

In this E-Bite, you'll discover how demand-driven replenishment (DDR) changes the game! All the classic MRP elements are present—classifications, stock positioning, lead time, and buffers—see how SAP S/4HANA recalculates these elements using DDR to reduce demand-supply variability. With information on planned innovations for DDR, you'll get that competitive edge.

The authors of »Introducing Demand-Driven Replenishment (DDMRP) in SAP S/4HANA« Ferenc Gulyáássy The focus of his work is capacity-based project and production planning.

Ferenc Gulyáássy, Jawad Akhtar in portrait - Introducing ...

To identify products which can act as decoupling points, products are systematically evaluated and classified based on goods issue value, decoupled lead time, usage across BOMs and variation in actual demand. Using the results of these classifications, you identify products that are relevant to Demand-Driven Replenishment (DD-relevant products). For more information regarding product classification, see Schedule Product Classification (DD) and Schedule Lead Time Classification of Products ...
