Good husbandry and managing pig housing can reduce the impact of cold stress on swine herd performance. As a pig producer, managing heat loss during winter months can be a struggle for the health of your pigs and your profits, particularly for pigs that are housed predominantly outside or in unheated shelters.

Cold Temperature Management for Pigs

You can also consider digging a mud hole in the pen that the pigs will wallow in. The mud serves to keep the pigs warm in winter and cool in summer, and conditions their dry, scaly skin. Pig management also involves providing them with the correct food and water. A plentiful clean water supply is essential for the continued health of the pigs; their drinking water should also be changed regularly.

...

In areas where hog cholera is present, it is important that you vaccinate your herd. You should reduce visitors to the farm and not allow any pig meat near any pigs (this is a recommendation that should be followed regardless of the risk of disease). Any new pigs that you introduce to the farm should be quarantined.
