Instructor's Manual
Chapter 0 Here is a
sketch of the solution.
Make two piles, A and
B, of nodes; initially
empty. Then, starting
with the entire graph,
add each remaining
node to A if its degree
is greater than $1/2$ of
all remaining nodes

Online Library
Michael Sipser
Chapter 1 Solution

and to B otherwise,
then discard all nodes
to which it isn't (is)
connected if it was
added to A (B).

Michael Sipser

Chapter 1 Solution

Solution: by part (a), I can always split D into B and A which both are infinite and disjoint regular subsets. And similarly, I can split A into A_1 and A_2 , both of them regular infinite and disjoint. Consider $C = B \cup A_1$. Of course C is regular (union of two regular languages is regular) and infinite.
