Human factors and ergonomics (commonly referred to as human factors) is the application of psychological and physiological principles to the engineering and design of products, processes, and systems. The goal of human factors is to reduce human error, increase productivity, and enhance safety and comfort with a specific focus on the interaction between the human and the thing of interest.

Human factors and ergonomics - Wikipedia

Edheads is an online educational resource that provides science and math games and activities that promote critical thinking. Choose from Simple Machines, Virtual Knee Surgery or Stem Cell Heart Repair, among others. All activities meet state and national standards.

Edheads

Investigates the manual drive train and major components. Examines transmissions, drive shafts, differentials, and drive axles. Discusses diagnosis and troubleshooting. At the end of the class, students will be required to take the ASE A3 test in order to earn a final grade for the course. 15 hours of lecture and 30 hours of lab are required.
