Some form of globalization may be inevitable over the long-run, but the historic bumps spurred by economic crises and other consequences suggest that change is the only reliable constant. According to U.S. Customs and Border Protection, escalated U.S. tariffs on Chinese imports raised \$20.8 billion through mid-July 2019.

The Impact of Globalization on Economic Growth

There are two ways of looking at globalization. One is as an accidental or inevitable affect of economic growth; industry, technology, communication, etc. As the economy grows, it is only natural for a global market to become established in previously local areas. For this to happen, free trade and the free movement of capital are essential.

Globalization does not have any positive impact on agriculture. On the contrary, it has few detrimental effects as government is always willing to import food grains, sugar etc. Whenever there is a price increase of these commodities. Government never thinks to pay more to farmers so that they produce more food grains but resorts to imports.
