### The Second Brain: A Groundbreaking New Understanding of ...

The enteric nervous system or intrinsic nervous system is one of the main divisions of the autonomic nervous system and consists of a mesh-like system of neurons that governs the function of the gastrointestinal tract. It is capable of acting independently of the sympathetic and parasympathetic nervous systems, although it may be influenced by them. The ENS is also called the second brain. It is derived from neural crest cells. The enteric nervous system is capable of operating independently of
