Web API controllers are similar to MVC controllers, but inherit the ApiController class instead of the Controller class. In Solution Explorer, right-click the Controllers folder. Select Add and then select Controller. In the Add Scaffold dialog, select Web API Controller - Empty.

Get Started with ASP.NET Web API 2 (C# ... - docs ...

When you create a web API, it is often useful to create a help page, so that other developers will know how to call your API. You could create all of the documentation manually, but it is better to autogenerate as much as possible. To make this task easier, ASP.NET Web API provides a library for auto-generating help pages at run time.
